RESIDENTS FROM DUKE UNIVERSITY HOSPITAL, DURHAM, NORTH CAROLINA

Fred Glover, M.D.

(Assigned to Tulane Pediatrics from September 5, 1956 to October 5, 1956)

W. B. Ardrey, M.D.

(Assigned to LSU Pediatrics from November 1, 1956 to December 31, 1956)

Charles Neal, M.D.

(Assigned to Tulane Pediatrics from January 1, 1957 to February 18, 1957)

Virginia Sanford, M.D.

(Assigned to LSU Pediatrics from March 1, 1957 to April 30, 1957)

A. W. Renuart, M.D.

(Assigned to Tulane Pediatrics from May 10, 1957 to June 30, 1957)

RESIDENTS FROM OTHER HOSPITALS AND DEPARTMENTS

William McBride, M.D.

(Exchange Resident from Veterans Administration Hospital, New Orleans—assigned to Tulane Medicine from 7/1/56 to 9/30/56)

Louis Burroughs, M.D.

(Exchange Resident from Veterans Administration Hospital, New Orleans—assigned to Tulane Medicine from 7/1/56 to 9/30/56)

Robert I. Cox, M.D.

(Exchange Resident from Veterans Administration Hospital, New Orleans—assigned to Tulane Medicine from 10/1/56 to 12/31/56)

Nicholas P. DePasquale, M.D.

(Exchange Resident from Veterans Administration Hospital, New Orleans—assigned to Tulane Medicine from 10/1/56 to 12/31/56)

Robert L. Andreae, M.D.

(Exchange Resident from Veterans Administration Hospital, New Orleans—assigned to Tulane Medicine from 1/1/57 to 3/31/57)

John C. Kistler, M.D.

(Exchange Resident from Veterans Administration Hospital, New Orleans—assigned to Tulane Medicine from 1/1/57 to 3/31/57)

Charles Fitch, M.D.

(Exchange Resident from Veterans Administration Hospital, New Orleans—assigned to Tulane Medicine from 4/1/57 to 6/30/57)

Wm. H. Mosby, M.D.

(Exchange Resident from Veterans Administration Hospital, New Orleans—assigned to Tulane Medicine from 4/1/57 to 6/30/57)

Dean A. Smith, M.D.

(Exchange Resident from Ochsner Foundation Hospital, New Orleans—assigned to Tulane Orthopedic Surgery from 7/1/56 to 12/31/56)

O. Dabezies, M.D.

(Resident from EENT Hospital, New Orleans—assigned to Tulane Ophthalmology from 7/1/56 to 9/30/56)

Lyndell W. Blackmon, M.D.

(Resident from EENT Hospital, New Orleans—assigned to Tulane Ophthalmology from 10/1/56 to 12/31/56)

Joseph G. Seeger, M.D.

(Resident from EENT Hospital, New Orleans—assigned to Tulane Ophthalmology from 1/1/57 to 3/31/57)

Donald G. Hassig, M.D.

(Resident from EENT Hospital, New Orleans—assigned to Tulane Ophthalmology from 4/1/57 to 6/30/57)

Ramon Mouton, M.D.

(Resident from Veterans Administration Hospital, New Orleans—assigned to Radiology from 3/15/56 to 3/15/57)

Albert Hendler, M.D.

(Resident from Veterans Administration Hospital, New Orleans—assigned to Radiology from 8/15/56 to 6/30/57)

Geraldine Marie Peiffer, M.D.

(Resident from Massachusetts General Hospital—assigned to Anesthesiology from 1/1/57 to 3/31/57)

Jan Probst, M.D.

(Resident from Massachusetts General Hospital—assigned to Tulane Pediatrics from 1/7/57 to 2/17/57)

John Zimmerman, M.D.

(Resident from Mercy Hospital, Toledo, Ohio—assigned to Pathology from 3/1/57 to 3/31/57)

David Shurtleff, M.D.

(Resident from Massachusetts General Hospital—assigned to Tulane Pediatrics from 4/1/57 to 5/17/57)

Charles Stern, M.D.

(Resident from Veterans Administration Hospital, New Orleans—assigned to Tulane Ophthalmology from 2/7/57 to 6/30/57)

JOINT REPORT OF THE VICE-PRESIDENT AND THE DIRECTOR

June 30, 1957

The Honorable Earl K. Long Governor of the State of Louisiana Baton Rouge, Louisiana Dear Governor Long:

The Vice-President of the Board of Administrators and the Director of Charity Hospital submit the following report of the activities of the hospital for the fiscal year July 1, 1956 to June 30, 1957.

In submitting this annual report we wish to acknowledge at the outset our indebtedness to the individual members of the Board for their counsel so generously given in so many ways in the general administration of the Hospital. They have spent many hours of their time each month in the Hospital carrying out the various assignments in order that the Hospital might continue to function smoothly and efficiently.

Department Heads' reports of activities and accomplishments during the fiscal year are well presented. The report as a whole furnishes pertinent facts concerning the operation of this institution during the fiscal year. It is with great satisfaction that we wish to report that medical services rendered patients were of the highest quality and it is our sincere wish that this annual report affords you with interesting as well as informative reading.

Cost of operation—As compared with the previous year, cost of operation, that is, ordinary recurring expenses increased \$703,213.87, or 6.49% over the previous year from \$10,836,134.89 to \$11,539,348.76. Of the total increase, \$460,042.49, or 66.13% represented increases for personnel services and \$238,-171.38, or 33.87% increase in the cost of contractual services and materials and supplies. We wish to point out that prices of most commodities were higher than during the previous fiscal year particularly medical and surgical supplies. New and expensive innovations in the treatment of patients are geing added steadily in the hospital as medical and surgical knowledge widens which partially accounts for the general increase in the cost of care of patients.

Whereas there was made available additional funds in the amount of \$53,498.18 from the State Board of Liquidation, in addition to our legislative appropriation, we concluded the fiscal year with a deficit of \$99,200.27. We wish to point out, however, that the hospital remitted to the State Treasury \$342,960.14 during the year representing collections for medical services rendered ineligible patients, etc.

Personnel—We wish to report that employee-management relations have been satisfactory during the year. Employees were granted meritorious increases in pay in conformity with the State Civil Service Regulations. The labor turnover during the year equaled 52.06% of which over 75% were of the low paid group earning \$125.00 per month or less. We are still experiencing difficulty in securing the services of qualified technical personnel at the State Civil Service prevailing rate of pay.

Purchasing—Our purchases of supplies, material, equipment and contractual services for the needs of the hospital were made in accordance with the provisions of the state laws governing the procurement of supplies, etc.

Capital Expenditures—Expenditures for capital outlay out of our current years legislative appropriation had to be limited due to the increase in operating cost. Purchases of equipment during the fiscal year were as follows:

Appropriation	Fiscal	Year	1955-	1956		 	 .\$	36,928.07
Appropriation	Current	Fiscal	Year	1956-	1957	 		17,412.53
Endowment	Funds					 		66,050.81
								120,391.41

Major items of equipment purchased were mostly for the replacement of worn out and obsolete equipment as follows:

Automotive

1	Ford Courier	Ambulance\$	2,589.88
2	Cadillac Am	bulances	19,059.50

Building and General Plant

	Compressor		5,310.53
1	Deaerating	Heater	10,957.86
1	Generating	Unit	2.435.00

Laboratory-Medical

2	Urological Tables	7,940.00
2	Diagnostic X-Ray Units	17,700.95
20	Operation Bases Tielt	07 400 00

At the end of the fiscal year June 30, 1956, there remained an unencumbered balance of \$947,015.08 from the \$1,903,075.00 made available to the hospital as a means of financing repairs, alterations, and the replacement of worn out and obsolete equipment.

During the fiscal year purchases of equipment and commitments for alterations, repairs and purchases of equipment were as follows:

An amount of \$53,985.00 was expended for equipment for the Heart Station. Our present facilities are now up to date and compare favorably with the best in the country.

After many months of study and ground work by the House Committee of the Board, and with the assistance of the Chiefs of Diagnostic and Therapeutic X-Ray Departments and leading Radiologist in the state, tentative plans were arrived at for the complete renovation, expansion and replacement of worn out and obsolete equipment in the Diagnostic and Therapeutic X-Ray Departments located on the 7th and 8th Floors of the Main Hospital Building and certain other related areas estimated to cost as follows:

Alterations and Additional Space	485,000.00
	245,000.00
\$	730,000.00

The Louisiana State Building Authority was accordingly authorized to employ architects for drawing plans and specifications of this project which is estimated to be completed and ready for operation by July 1, 1959.

One of the boilers in the Power House was so severely damaged as a result of an explosion that it was found desirable to replace this boiler with a new one at a total cost of \$53,500.00. Of this amount, \$13,720.20 was paid out of recovery from the insurance company for the damaged boiler.

Maintenance Physical Plant—The hospital buildings and equipment were kept in good condition throughout the year to the extent of available funds. The cleaning, waterproofing, and the renovation of the interior of the Colored Tuberculosis Building was done during the year at a total cost of \$26,008.00. The Tenth Floor of the Main Hospital Building was recovered with Armstrong Linotile at a cost of \$10,461.00. It was also found necessary to replace the damaged compressor in the Ice Plant at a cost of \$5,054.00. A Tennis Court was constructed on the grounds of the Student Nurses' Home at a cost of \$4,750.00. These major projects were paid out of Endowment Funds.

Patient Services—During the current fiscal year, 75,052 patients were admitted to the hospital as compared with 74,583 the previous year, an increase of 469. The daily average number of patients in the hospital equaled 2,413. Of the total admissions, 48,995, or 65.03% were from the New Orleans Metropolitan Area (Orleans, Jefferson and St. Bernard Parishes), and 25,356 from all other parishes of the state. Seven hundred and one (701) admissions were from other states and foreign countries and were admitted as emergency patients.

Out-Patient Visits—695,957 patients were given medical treatment in the clinics and emergency rooms during the fiscal year as compared with 635,277 the previous year, an increase of 60,680.

The Hospital Authorities have endeavored to live up to established policies of limiting admissions of those patients who are in need of medical and surgical attention, and who are unable to pay for these services. The only exception to this policy being those emergency cases who seek treatment and who, because of their condition, must be attended to. However, if found ineligible, they are billed for all services rendered. We discourage the admission of patients who are able to pay for services for several reasons: First—the doctors of this city contribute many hours of their time without charge and at considerable sacrifice in order to serve the indigent sick. It is certainly not our purpose to compete with them in their profession. Second—we do not want to compete with private hospitals. Third—as a purely practical matter, it is costing the hospital money to administer to pay patients even though they pay for the services.

During the fiscal year, the hospital collected \$266,000.00 for services rendered ineligible patients, which amount was transferred to the State General Fund.

Patients who can pay are only admitted to the Hospital in emergency cases otherwise they are referred to private institutions. However, an aggressive effort is being made by the Board to prevent abuses,

At the regular Board meeting held on October 23, 1956, there was created a committee to be known as the Interdepartmental Committee composed of three or more members of the Board. The first project assigned to the Committee was for the study and evaluation of the problem of eligibility of patients for Charity Hospital services both in and out patients. Mrs. Ila H. Slater, a member of the Board, was appointed Chairman of this Committee. During the fiscal year, Mrs. Slater and her committee, made extensive research work and study concerning the creating of uniform eligibility rules for admission of charity patients to State General Hospitals and screening of ineligible patients. The Board was in full accord with Mrs. Slater's recommendations as to procedure to be put into effect in the screening of patients in the hospital. However, to effectively screen patients on a twentyfour hour basis, it was estimated we would require the services of thirtythree additional Intake Interviewers estimated to cost approximately \$88,000.00 per annum. Due to lack of funds, we have been unable to put this program into effect as yet.

In conclusion, we wish to express our appreciation to the Sisters of Charity, who throughout the year, have continued to labor with the best interest of this hospital and the patients within it. To the members of the visiting staff of doctors and to our residents and internes we express deep appreciation for their constant devotion to duty and for their willingness to assume the extra burdens placed upon them throughout the year.

And to the Department Heads and all personnel in the hospital we express our thanks for their cooperation.

Respectfully submitted,

Dr. Don L. Peterson Vice-President Board of Administrators

Leo J. Kerne, M. D., Director Charity Hospital of Louisiana at New Orleans

CHARITY HOSPITAL OF LOUISIANA AT NEW ORLEANS

COMMENTS ON OPERATIONS

Fiscal Year July 1, 1956 to June 30, 1957

I submit herewith the Financial Report accounting for the Revenues and Expenditures of all funds for the fiscal year July 1, 1956 to June 30, 1957.

In the following general comments, there is presented comparisons in the cost of operation for the current fiscal year as compared with the previous year and other statistical information.

Cost of operation increased \$703,213.87 or 6.49% over the previous year, from \$10,849,058.64 to \$11,539,348.76.

We ended the fiscal year with a deficit of \$99,200.27. The Legislative appropriation for the fiscal year 1957-1958 provided funds to offset this deficit.

I wish to point out that as authorized by the State Commissioner, Division of Administration, we retained from the total of \$374,012.60, revenues collected and subject to refund to the State Treasurer, an amount of \$31,052.46, which amount was credited to Cost of Operation in the month of June, as follows:

Accounting Dept. Personnel Fees paid to attorney for coll	\$ 22,456.03	
Patients Accounts Rece	8,596.43	
	\$ 31,052.46	\$

	7,486,660.38	\$ 7,044,493.25	\$442,167.13	6.28%
Analysis-Drugs and Surgic	al Supplies	1955-1956	Increase	Percent
Pharmaceuticals \$\ \text{Anesthesia Gases - Oxygen} \\ \text{Medical & Surgical Supplies} \\ \text{X-Ray Films and} \end{array}	685,739.98 62,702.44 647,873.68	\$ 610,788.75 60,460.83 599,707.34	\$ 74,951.23 2,241.61 48,166.34	12.27 % 3.71 % 8.03 %
Photographic Supplies	213,072.87	195,501.11	17,571.76	8.99%

The number of employees on the payroll as of June 30, 1957 remains the same as at the end of the previous fiscal year, namely, 3,261. However, during the year, 1,736 persons were employed and a like number released accounting for a labor turn-over of 52.06% compared with 44.80% turn-over the previous year. Resident Doctors, Internes and Student Nurses are not considered as employees and are excluded in the above figures.

\$ 1,609,388.97 \$ 1,466,458.03

\$142,930,94

9.75%

Whereas the personal service cost increased \$442,167.13 over the previous year, the direct nursing personnel received 51.49% of the total cost. In other words, an average of 1,387 employees received over 50% of the increase in payroll cost. During the year 811 man-days were lost due to employee accidents.

A comparative analysis of employees on the payroll at the end of each fiscal year is as follows:

	June 30		
	1956	1957	Increase
Registered Nurses. Practical Nurses Nurses Aides.	346 261 780	333 232 825	13 29 45*
	1,387	1,390	3*
All Other Personnel	1,874	1,871	3
	3,261	3,261	
		1	

^{*} RED Figures

The cost of food consumed increased \$42,698.24, or 4.14% over the previous fiscal year from \$1,031,831.13 to \$1,074,529.37. This increase is not out of line considering that all commodities consumed have shown substantial increases in price.

During the fiscal year we received from the U. S. Surplus Commodities Corporation, food evaluated at the prevailing market prices at time of receipt, amounting to \$43,725.49 compared with \$94,370.56 received the previous year. The donations are not included in the cost of food consumed.

The cost of Drugs and Surgical Supplies shows a substantial increase over the previous year. From the analysis shown hereinabove, it will be noted that the cost of pharmaceuticals increased 12.27% over the previous year.

Comparative Cost-Patient Services

	1956-1957	1955-1956	Increase	Decrease
Patients Admitted	75,052 880,853	74,583 915,584	469	34,731
Cost per Patient—Day Patient Visits (Clinics)	\$11.71 695,957	\$10.60 635,277	\$1.11 60,680	
Cost per patient visit	\$1.20	\$1.21		.01

Inventory-Materials and Supplies

	June 1956-1957	30 1955-1956	Increase	Decrease
Pharmaceuticals Food Housekeeping Supplies Office & Multigraph Supplies Plant Maintenance Matl. & Supplies Medical & Surgical Supplies	6,625.56 51,556,61	\$ 58,259.94 13,269.95 26,588.64 5,470.39 52,130.31 73,829.29	\$ 1,607.14 9,078.34 1,155.17 4,541.28	3,723.47 573.70
	\$241,633.28	\$229,548.52	\$16,381.93	\$4,297.17

At the end of the fiscal year June 30th, 1957, physical inventories were taken of all consumable materials and supplies in stores. It was found necessary to adjust book inventories due to small overages and shortages in the aggregate amount of \$513.39. During the year we charged off obsolete and unusable supplies in the amount of \$720.93. Inventories of materials and supplies on hand as of June 30, 1957 were evaluated at cost.

Material and supplies inventory turnover during the fiscal year were as follows:

	Turnover	Ra	tio
Pharmaceuticals Food Housekeeping Supplies Office & Multigraph Supplies	9.35 7.81 7.75	39 47 47	days days days days
Maintenance Materials and Supplies	and the same of th		days

Capital Expenditures

Expenditures for additional and replacement of worn out equipment during the fiscal year amounted to \$120,391.41 as follows:

Schedule 1-C

Appropriation 1955-1956 Appropriation 1956-1957	\$ 36,928.07 17,412.53	\$ 54,340.60
Trust Funds		66,050.81
		\$120,391.41

Contractual Commitments

itractual Commitments	Ju	ne 30	
	1957	1956	Decrease
Contractual Services Materials and Supplies Equipment	\$ 2,837.10 27,347.09	\$ 712.00 32,963.93	\$ 2,125.10* 5,616.84
(Capital Outlay) State Sales Tax &		37,836.77	37,836 77
Transp. (Est.)	290.00	1,500.00	1,210.05
	\$ 30,474.19	\$ 73,012.70	\$42,538.51

From the above it is to be noted that as of June 30, 1957, Purchase Order Commitments outstanding were \$42,538.51 less than at the end of the previous fiscal year. It was found advisable to materially reduce the issue of purchase orders during the month of June to avoid an excessive operating deficit at the end of the fiscal year.

Sundry Revenues

1956-1957	1955-1956	Increase	Percent Increase
25,753.00 62,266.48	\$160,718.41 25,116.52 70,458.18 23,644.52	\$106,031.43 636.48 8,191.80* 4,401.24*	65.97 % 2.53 % 11.63 % * 1.86 % *
\$374,012.60	\$279,937.63	\$ 94,074.97	33.60%
	\$266,749.84 25,753.00 62,266.48 19,243.28	\$266,749.84 \$160,718.41 25,753.00 25,116.52 62,266.48 70,458.18 19,243.28 23,644.52	\$266,749.84 \$160,718.41 \$106,031.43 25,753.00 25,116.52 636.48 62,266.48 70,458.18 8,191.80* 19,243.28 23,644.52 4,401.24*

Collections during the fiscal year increased \$94,074.97 over the previous year. However, it is to be noted that collections from Ineligible Patients Accounts increased \$106,031.43 or 65.97% over the previous year. Billings against ineligible patients amounted to \$548,476.81 compared with \$323,328.19 the previous year, an increase of \$225,148.62. Revenues from Auctioneer's fees decreased \$9,406.21 as compared with the previous year's collections. We have no control of Revenues from this source. As provided by General Appropriation Act 271 of 1950, all sundry revenues collected have been transferred to the Louisiana State Treasurer less an amount of \$31,052.46 retained representing direct expense of collections.

Insurance

Adequate insurance has been provided on all Hospital properties. All employees and professional personnel are fully covered by Workmen's Compensation Insurance.

General

Expenditures during the fiscal year were made and accounted for in accordance with the provisions of the State Budget Act,

All obligations incurred and due by the Hospital as of June 30, 1957 are current and accounted for and liabilities set up therefor.

* RED Figures

Following our customary practice, we have taken advantage of all allowable cash discounts in accordance with the terms of purchase contracts. Cash discounts earned during the year amounted to \$38,908.94. During the year, we paid \$49,977.59 in State Sales Tax.

Miscellaneous Accounts Receivable of record as of June 30, 1957, viz: \$7,275.53 are current obligations due the Hospital. The amount of \$26,662.55 due by the National Foundation for Infantile Paralysis represents charges against the State Parish Chapters and is guaranteed by the National Foundation.

Visitor's Food Service Department

The operation of the Cafeteria is financed by a separate Legislative appropriation of \$7,500.00 as a Revolving Fund, subject to be returned to the State Treasury should the operation of the Cafeteria be discontinued.

Permission has been granted to a number of soft-drink dealers to install soft drink dispensing machines, from which the Hospital receives a commission on sales. The Hospital furnishes electricity only to operate the equipment.

Profits earned during the fiscal year as compared with the previous year are as follows:

28,966.93 7,353.80	\$28,328.78 7,507.20
21,613.13	\$20,821.58
	7,353.80

As provided by Law, the net profits earned are subject to be transferred to the State Treasurer.

Trust Funds

During the year, various donations and grants to the Hospital were received, as follows:

Permanent Funds Restricted as to use Unrestricted as to use Special Project funds Federal Research Grant	17,270.33 11,330.10 21,723.87
	\$88.801.30

Bond Liquidation Fund

During the fiscal year, \$337,000.00 of Bond obligations were retired and total interest on bonded indebtedness amounting to \$178,670.50 was paid.

As authorized by the Board of Administrators, \$287,846.08 was transferred to Operating Funds.

During the year the maximum amount of the Bond Liquidation fund was invested in ninety days U. S. Treasury Bills. Interest earned during the year amounted to \$9,997.07.

The balance of \$436,028.25 remaining in the fund as of June 30, 1957 provides a reserve for the retirement of bonded indebtedness and accrued interest on bond obligations due and payable as follows:

August	1, 1	957	 \$222,683.25
October	15,	1957	213,345.00
			\$436,028.25

Respectfully submitted, L. A. MILLET Secretary-Treasurer

ANNUAL REPORT PURCHASING DEPARTMENT July 1, 1956 to June 30, 1957

At the close of the year the Department was operating with ten employees.

There were 21,117 Purchase Orders, Purchase Order Changes and Purchase Order Cancellations written during the twelve-month period. An average of 3.107 items per purchase order resulted in approximately 65,600 individual purchase transactions.

All specifications, purchase orders and contracts for all supplies and services for the use of the Hospital were written by the Department with the exception of four major projects on which the services of professional engineers and an architect were obtained.

All contracts and orders were awarded to the lowest responsible bidders on a competitive basis. The services of testing laboratories were utilized to assure compliance with certain specifications.

In addition to the inspection requirements for meat and meat products, fresh fruits and vegetables, poultry and eggs, dried beans and cereals and processed foods and the corresponding services of the U. S. Department of Agriculture and the Louisiana State Department of Agriculture, the services of the National Coffee Association were utilized in the testing of coffee purchased for the Hospital's use.

Surplus commodities received from the Food Distribution Section of the State Department of Education were as follows:

Cheddar cheese
Rice 39,000 lbs
Dried powdered milk, 220 lbs/case120 drums
Fresh eggs, 30 doz/case435 cases
Fresh cabbage, 50 lbs/sack118 sacks
Turkeys
Fresh plums, 28 lbs/box315 boxes
Butter, 63 lbs/box250 boxes
Lard, 50 lbs/can280 cans
Processed cheese, 30 lbs/ctn527 ctns
Red kidney beans, 100 lbs/sack85 sacks
Navy beans, 100 lbs/sack85 sacks

The market value of these commodities was \$43,725.49, a reduction of \$50,645.07 below the value of those received the previous year.

Respectfully submitted,

ANNUAL REPORT PERSONNEL DEPARTMENT

July 1, 1956 to June 30, 1957

Total number of active employees as of June 30, 1957:......3,237

Salary increases effective August 1, 1956 were awarded to 1,944 employees and special entrance rates of pay were provided for Graduate Nurses I and II and Practical Nurses I and II in an effort to retain professional personnel in our nursing services.

The Personnel Office was rearranged in September and all employees were centralized in one large office. A file room was set up to house over 27,000 inactive records. Telephones were relocated, the offices were painted and work was started to clear all files of unnecessary materials.

Mr. Clarence O. Roberts checked this department's records against those of the Accounting Department and those of the Department of State Civil Service in November and December. All was found to be in order and a most favorable report was submitted by Mr. Roberts.

A new civil service pay plan to be effective February 1, 1957 was approved by Governor Earl K. Long. The Hospital, lacking sufficient funds, found it necessary to request permission to deviate from this new pay plan until such time as the money was available to make the necessary adjustments. This permission was granted by the State Civil Service Commission until July 1, 1957. In the meantime, several studies were made to determine the cost to the Hospital of meeting these revised pay scales. When the Legislature, at its fiscal session, granted the needed monies, 2,995 salary adjustments totaling \$48,343.50 monthly were made effective July 1, 1957.

Respectfully submitted,

/s/CHARLES C. STURTEVANT Charles C. Sturtevant Personnel Director

ANNUAL REPORT SISTERS' DIVISIONS

July 1, 1956 to June 30, 1957

The annual reports of the four departments which comprise the Sisters' Divisions—Nursing Service, School of Nursing, Housekeeping and Dietary—have been prepared in detail by each of the respective departmental directors. A brief summary reveals the following:

The Nursing Service Department has continued its efforts to provide adequate nursing care by means of recruitment and assignment of professional and practical nurses. Although no great increase in the number of professional nurses is evident, the department has strengthened and solidified its previous gains by conducting a continuous in-service training program for practical nurses and nurse aids, and by a series of staff education meetings which have been held for professional nurses and other personnel. The department is continuing its efforts to decrease the number of non-professional employees and to increase the number of professional employees correspondingly.

The School of Nursing has maintained its national accreditation despite numerous problems, among which might be listed the turnover of personnel on the teaching staff. Inability to secure adequately trained teaching personnel has resulted in curtailment of student programs in some areas, particularly in the affiliation program, but it is hoped that this set-back is temporary and that the School will soon be able to resume its full-scale affiliation program. This program is of great value to smaller schools in other areas which supplement the training of their students by a period of affiliation at Charity Hospital.

The Housekeeping Department is continually striving to improve its service and to maintain a safe, sanitary and attractive environment. During the past year, the department has assumed responsibility for all general cleaning duties on three of the larger patient areas. Custodial employees on these divisions were transferred to the Housekeeping Department and a full-time housekeeping supervisor was assigned to each division. It is hoped that eventually all custodial personnel will come under the direct supervision of this department. Difficulty is still being experienced in the department's attempts to maintain adequate linen supplies on the patient divisions at all times.

In the Dietary Department, the shortage of qualified Dietitians has made it necessary to supplement the staff with supervisory personnel who are not Dietitians in order to provide adequate meal service on the patient divisions. Despite this handicap, the department has been able to extend its hot meal service, in which meals are served directly to the patients from steam carts which are taken into the wards, to approximately every patient area. The cost of food continues to climb, thus making it difficult for the department to operate economically and efficiently. The quality of meals furnished to patients, personnel and students in the various training programs conducted at the hospital, is excellent, and the department hopes that it will be able to adhere to its established high standards of service and quality.

The Director of the Sisters' Divisions was on an extended tour of Europe during three months of the fiscal year. Much of this time was spent in touring the hospitals, nursing homes, medical facilities and health agencies of the countries visited. The National Hospital Council of Italy which met in Rome

during April, and the International Hospital Council which met in Lisbon in June, were attended, and interesting comparisons were evident between the European hospitals and health services and those of our country. Much information was garnered which will be of value in the overall planning, coordinating and proper functioning of all activities which come within the scope of the Sisters' Divisions.

The administrative staff of Charity Hospital has been consistently courteous and cooperative in all of our associations during the past year, and the Sisters' Divisions wish to take this opportunity to express appreciation to those who have helped us carry on the work of the department during the past year.

Respectfully submitted, /s/SISTER MARGARET Sister Margaret, Director Sisters' Divisions

ANNUAL REPORT NURSING SERVICE DEPARTMENT July 1, 1956 to June 30, 1957

Director of Sisters' Divisions Sister Margaret, R.N., B.S., F.A.C.H.A.
Director of Nursing Service Sister Laurence, R.N., B.S.
Assistant Director of Nursing Service Willie B. Mask, R.N., B.S.
Instructor Supervisors Mrs. Petrona Daigle, R.N. Mrs. Janice Quinn, R.N.
Administrative Assistant Norma B. Carter, Ph.B.
Supervisory Staff Daughters of Chartiy. 11 Lay Supervisors
General Duty Nurses Full-time
Non-professional Personnel 25 Licensed Practical Nurses 25 Psychiatric Aides 8 Nurses Aides II and III 64 Nurse Aide I. 8 Central Service Workers 12 Custodial Workers 2 Clerical Personnel 11 Miscellaneous Personnel 11
The above figures include all personnel giving services to hospitalized and out patients, and who are under the direction of the Nursing Service Department. On June 30, 1957, the following personnel were employed to give nursing care to the hospitalized patients:
Professional Nurses Supervisory Staff
Non-professional employees Licensed Practical Nurses

A review of the aims and activities of the Nursing Service Department during the past fiscal year reveals evidence of some improvement in one important area of patient care, the provision of adequate nursing personel. A comparison between the number of Nursing Service employees in last year's report and this report shows no appreciable increase in the total number of employees engaged in bedside nursing. There is an actual decrease in the number of professional general duty nurses and nurse aides, but a slight increase in the number of head nurses and practical nurses.

Consideration of these statistics alone does not adequately justify the statement that the nursing care of the patient has improved, but the following accomplishments are of significance:

- The availability and employment of better prepared supervisory, head nurse, and practical nurse personnel.
- 2. More flexibility in the employment and use of part-time nurses.
- 3. An intensive in-service educational program.
- An increase in the minimum salary for professional and practical nurses and the shorter work week for all classifications of personnel in the department.
- A review of the nursing functions on the larger services which resulted in the reallocation and supervision of all cleaning duties and ordering of household supplies to the Housekeeping Department.
- Better planning for the services of student nurses who work for pay on weekly days off and during vacation periods.

The nursing services in Charity Hospital were benefited materially through the educational program conducted by the department. The graduate nurse staff participated in monthly programs which provided opportunities for professional growth and a medium for the presentation of hospital policies and procedures. The nurses also served on subcommittees of the Committee on Revision of Nursing Procedures. This committee, which meets monthly, has representation from the School of Nursing, The Schools of Practical Nursing, the Nursing Service Department, and other hospital departments as indicated. Its function is to keep nursing procedures abreast of the advances in medicine. Five basic nursing procedures have been reconstructed, demonstrated and made available to the entire nursing staff. Included in this number is the table of procedures for diagnostic tests and laboratory work.

The Premature Infant Center continued to offer to nurses a program of orientation and observation in the care of premature infants. Fifteen professional nurses, three practical nurses, and three nurse aides from various agencies including Charity Hospital attended. In addition to this threeweek program, shorter periods for the orientation to the care of premature infants were provided for 309 graduate and student nurses, and 25 non-nurses.

The Nursing Service Office staff conducted orientation programs for dietetic interns, physical therapy students, and practical nursing students, with emphasis on interdepartmental relations.

The in-service education program for employed practical nurses and nurse aides provide opportunities and incentives for development of the employee. Both programs are continuous, and each course offers lectures, demonstrations, and clinical practice which are planned to stimulate effec-

tive performance in current assignments. Completing the courses were 40 practical nurses and 111 nurse aides. The instructors for these programs attended a very worthwhile two-day teacher-trainer institute held at Charity Hospital in January. This project is sponsored by the National League for Nursing for the improvement of nursing services throughout the country.

The one year basic preparation of practical nurses remains the responsibility of the public and vocational schools in this area. The two schools in New Orleans have state accrediation, and affiliate with the Nursing Service Department of Charity Hospital for 32 weeks of clinical experience. One class from the Booker T. Washington High School completed the course and 22 students were graduated. A second class of 18 students is in the sixteenth week of clinical experience. The L. E. Rabouin Vocational School admitted one class of 14 for affiliation, 9 of which completed the course and were graduated. Upon completion of each class, the majority of the graduates were employed at Charity Hospital.

The extension course for licensed-by-waiver practical nurses conducted by the Jefferson Parish Trade School and affiliation with the Nursing Service Department for clinical experience was completed by one class of 14 students. Three of these were employed at Charity Hospital. A second class of 9 students began the course in February. The classes and clinical practice are held in the evenings at a time which supplements the nursing staff during hours of acute shortage of nursing personnel.

There were other activities of the department that resulted in better patient care. The Recovery Room was reorganized after the move back to the 12th Floor, and the nursing staff arranged to better meet the needs of the patients. The Poliomyelities Center nursing staff was increased and maintained during the high census which lasted through November. The New Orleans Chapter of the American Red Cross gave invaluable assistance by recruiting nine registered nurses who were employed over a period of six months during this emergency. A referral system between the doctors and nurses of Charity Hospital and the City Health Department Nurses was inaugurated on the Tuberculosis and Pediatric Services and in the Outpatient Department. A work manual for ward clerks on the Obstetrical Service was compiled and made available and four nursing service policies were revised, issued and followed up for supplementary action.

The Health Clinic, located in C602 reported 4195 patient visits during the fiscal year. Two immunization programs are conducted through this clinic, typhoid and poliomyelitis. Booster injections for typhoid were given to 210 student nurses. The administration of Salk vaccine for poliomyelitis was initiated in the spring and early summer, and a total of 1283 injections were given to employes, students and residents and interns and their dependent families.

The past year has been one of achievement for the Nursing Service Department. Aware of the acute situation existing in hospitals today, that of too few well prepared people to care for so many patients, it has moved steadily toward more adequate nursing care and we begin the coming year with renewed faith in the accomplishment of our main objective, a stabilized and well prepared nursing staff to give more and better nursing care.

Respectfully submitted,
/s/ SISTER LAURENCE
Sister Laurence

ANNUAL REPORT OF THE CHARITY HOSPITAL SCHOOL OF NURSING

July 1, 1956 to June 30, 1957

ORGANIZATION

One major change was made in the organization. At the retirement of Miss Eugenia Stuart the responsibilities of her job as educational director were combined with that of the clinical coordinator, and the job was converted into an instructor position. Future plans provide for a committee of instructors representing the major clinical areas to serve as a coordinating committee, and the position of clinical coordinator to be converted into a position that has responsibility for both teaching and curriculum work.

EDUCATIONAL PERSONNEL AND FACILITIES

The instructional personnel qualify for their positions, but the major problem continues to be the rapid turn-over. During the current fiscal year there were fourteen resignations, 35% of the total. Marriage and better salaries are the major reasons for resignation. Recruitment of new faculty has become increasingly more difficult because local salaries for teaching personnel do not compare favorably with other sections of the country; and now that L.S.U. no longer offers a program for teacher preparation, personnel must be imported from out of state. At the present there are three positions vacant, two teaching positions and one assistant director.

CURRICULUM

Work in the curriculum has consisted primarily in enriching the program instituted in 1953. Experience in the Out-Patient Department is being gradually added to the blocks of learning in pediatrics, obstetrics, medicine and surgery. It is planned to provide a block of experience in the clinics as soon as provision can be made for an instructor to supervise the work of the students. The three days of experience with the City Health Department Bureau of Nursing has been reduced to one day at the request of the Health Department; the reason given was inadequate staff and increased requests for student experience. One week of experience in a nursery school (Gingerbread House) as part of the pediatric block was begun during the year. The block of experience in tuberculosis was reduced from four to two weeks, and assignment made to poliomyelitis for two weeks. Experience in the care of poliomyelitis patients meets a recommendation of the State Board of Nurse Examiners.

CURRICULUM (CONTINUED)

At the request of the affiliating schools efforts have been made to delay assignment of students to the evening and night duty until the students have had an opportunity to become familiar with the hospital policies and learn the fundamental principles of caring for children. There is a definite need for more supervision in this area where students are assigned for learning experience.

ACCREDITATION

The school of nursing achieved national accreditation in 1956, and since that time four of its faculty have been invited to make survey visits to other schools of nursing seeking national accreditation. Thus far three members have visited four schools. This opportunity has been a good learning ex-

S

perience for the individual faculty member, and it has served to make the school and hospital better known.

The annual visit of the Educational Supervisor of the State Board of Nurse Examiners was not made during the current fiscal year; it is scheduled for August, 1957.

STUDENT WELFARE

The health status of the student on a whole is good. The third and fourth year residents on a rotating basis serve as the physicians, and one of the instructors devotes the major part of her time as health nurse. The students have been given excellent care, but there is a lack of continuity in some cases which would be obviated were there a school physician. The students were given an opportunity to have the "Flu vaccine"; practically all availed themselves of the privilege.

Residence. The total number of residents is 413. Of these 360 are student nurses, 46 anesthesia students, and 7 staff. With the reduced census an effort has been made to convert the smaller three bed rooms into two bed rooms and several of the smaller two bed rooms have been made into single rooms. This change was needed for the rooms were crowded and inadequately furnished; at present two students share a dresser and two and three students share one desk. The goal is for each to have her own desk and dresser. The interior of the building is being painted, and a new ice water unit has been ordered. The floor in a large number of bedrooms is in poor condition.

The outdoor recreational facilities were greatly improved with the addition of a tennis court on the side lawn. It is hoped that in the near future the court may be converted into a combined tennis and basket ball court and lighting provided for the lawn.

RECRUITMENT AND FINANCIAL AID

Recruitment was done by mail with the exception of several visits made by students who were invited to speak at their alma maters. The school catalog was mailed to all state accredited schools in Louisiana and in the Southern area to high schools that are accredited by the Southeastern Association.

Open House was held for the high school students in the vicinity. One thousand seven hundred seventy-four inquiries were received and bulletins were mailed in answer to these individual requests, 269 applications processed, 144 accepted, 92 rejected, and 118 admitted. Of the number admitted 62 were from Louisiana.

The hospital granted loans of one hundred and ninety dollars to 11 of the students entering the fall class. Twenty-one students were granted scholarships by various organizations. Twenty-seven loans ranging from \$10.00 to \$200.00 were made from the Kellogg Loan Fund to students in the school during the fiscal year. Students with advanced standing work for the hospital nursing service on a pay basis on legal holidays and their days off at their discretion; This practice is helpful to the student financially and to the hospital in providing nursing care. Students worked 3,505 days during the fiscal year.

AFFILIATIONS

There are seventeen schools of nursing from seven states who send students for experience in pediatrics, obstetrics, and communicable diseases. The large majority of students come for pediatrics. Dillard University sends its students for medicine and surgery as well as the above named services. Two schools discontinued affiliations.

A one day institute was held for the affiliating schools giving the teachers and administrators an opportunity to discuss with this school their needs and difficulties and to visit our facilities. Thirty-five attended this institute.

The one problem expressed by several schools was the lack of supervision and direction given to students receiving experience in the pediatric department; this lack of supervision applies to the evening and night duty periods.

Sincerely yours,

/s/SISTER PAULINE, R.N. Sister Pauline, R.N. Director

ANNUAL REPORT DIETARY DEPARTMENT

July 1, 1956 to June 30, 1957

ACTIVITIES AND ACCOMPLISHMENTS

Eight dietetic interns completed their training on August 31, 1956, and three on January 31, 1957, making a grand total of 146 since the internship was established in 1944.

We have recently started serving in the wards on both the fourth and tenth floors. In comparison to the method of serving from the pantry, the ward type of service offers many more advantages, which are as follows:

- The patient now receives hot food, consequently the food is so much more palatable.
- There is very little chance of the patient getting the wrong diet, thus it could be considered a much more accurate type of service.
- A more cooperative atmosphere has been evidenced with other departments.
- 4. Comebacks due to this service have now practically been eliminated.
- It is a smooth running system of food service in comparison to the pantry type of service.

To date we are serving food from the wards on all floors but the third and ninth. We know that ward service on the third floor would, in all probability, prove to be very impractical; however, we feel that with proper planning, such service would work out very well on the Pediatric Floor.

The Ninth Floor Pantry was painted in September, and a large metal screen was built around the refrigerator equipment to keep the children away from it.

In the Formula Room a study has been started within the past two months on the effect of Nilevar, a drug, on the weight gain in premature infants. Nilevar may be of value in shortening the hospital stay and improving the mortality rate in prematures if it promotes a more rapid weight gain by its anabolic action. The Nilevar is administered for a six week period beginning on the third or fourth day of life. The dietary staff in the Formula Room receives a sealed envelope to assign babies either to the treated or control group and to add to the formula of the treatment group the prescribed amount of the drug. The duration of the project is approximately four months and studies are made on the infants from the premature infant center of both the treated and control group. The results will not be known until the termination of the project.

The kitchen in the Polio Building has been moved from the third floor to the basement. It is now a very lovely, clean, and spacious kitchen. Needless to say, it has improved the food service of that particular building tremendously.

During the year 11 Dietetic Interns and 85 Student Nurses rotated through the Nutrition Clinic Service.

The following list constitutes the bulk of patients instructed by the Nutrition Clinic during the fiscal year:

Diabetic Classes Obstetric Classes. Individual Instruction New—All Types Individual Revisits. Comparative figures of meals served are listed be	4,96	Patients Patients

ANNUAL REPORT HOUSEKEEPING DEPARTMENT

July 1, 1956 to June 30, 1957

The turnover of Personnel, including Linen and Sewing Section, this year was 133. Of this number there were 96 resignations and 37 removals.

One hospital matron position from the Professional Student Home was abolished, and an additional Custodial Supervisor II position established to provide for supervision of night work. One Custodial Worker II position from Sisters Living Quarters was transferred to the Linen Section where help was needed.

Additional duties delegated to the department this year was complete housekeeping responsibility on four floors in the Main building, third, fourth, fifth, and seventh floor. Twenty-seven positions were transferred from Nursing Service to this department, and converted into three additional Custodial Supervisors I positions, and twenty-four Custodial Workers I.

Ninety-two mattresses were renovated in patient sections, 66 for adult beds, and 26 crib mattresses.

In March this year new floor material, Armstrong Linotile, was laid on all ward sections of the Tenth floor.

Contract services were satisfactorily performed by the National Window Cleaning Company of the windows in all the buildings every two months; and every month on the first floor and basement of the Main building. The A. & M. Pest Control Company serviced the hospital buildings for pest extermination beginning January 1, 1957.

In the Salvage Division \$1,934.65 worth of salvage material was sold to salvage dealers.

The following linen replacements were made:

- 1,962 Bedspreads
- 9,108 Sheets for adult beds
- 4,385 Sheets for juvenile beds and rollers
- 1,298 Crib sheets
- 1,300 Bassinet sheets
- 7,595 Pillow cases
- 8,172 Bath towels
- 7,824 Huck towels
- 21,343 Wash cloths
- 2,478 Kitchen towels
- 9,384 Patient gowns
- 1,108 prs. Pajamas
- 1,400 Patient robes
- 2,768 Large pads
- 1,200 Bassinet pads
- 22,912 Diapers
- 1,500 Baby wraps
- 1,322 Hamper bags
 - 31 Trash bags
- 36 Ambulance stretcher pads
- 1,217 Aprons

- 535 Doctors operating gowns
- 1,067 Doctors operating shirts
 - 638 Doctors operating trousers
- 300 Doctors operating caps
- 2,093 Nurses scrub dresses 634 Nurses 2nd gowns
 - 642 Nurse Aide gowns
 - 307 White orderly smocks
 - 144 Grey orderly smocks
 - 88 Green orderly shirts
- 17,395 Surgical towels
- 11,548 Sterile wraps
 - 742 Blood P. Ap. cuffs
 - 144 prs. Scuffs
 - 378 Cubicle and bathroom curtains
 - 460 New Feather Pillows
 - 935 New Blankets for adult beds
 - 600 New Blankets for cribs
 - 250 Mattress protectors for adult beds
 - 87 Crib mattress protectors
 - 58 Long tablecloths
 - 240 Napkins
 - 48 Coffee bags

Respectfully submitted,

/s/ SISTER CLARISSE

ANNUAL REPORT DEPARTMENT OF PATHOLOGY

July 1, 1956 to June 30, 1957

- 1. Personnel as of June 30, 1957.
- 2. Report of School of Medical Technology.
- 3. Consolidated report of the Diagnostic Laboratories of the Department of Pathology.
- 4. Report of Division of Surgical Pathology.
- 5. Report of Division of Pathologic Anatomy.
- 6. Report of the Pasteur Institute.
- 7. Report of the Morgue.
- 8. Detailed report of the various laboratory divisions.

Submitted by Emma J. Moss, M.D. Director

REPORT POLIOMYELITIS CENTER

July 1, 1956 to June 30, 1957

This fiscal year a total of one hundred sixty-eight patients were admitted with a daily peak census of ninety-one in August, nineteen hundred fifty-six. Of the total admissions, one hundred fifty-five were diagnosed and treated for poliomyelitis. Twelve admissions were non-polio, and one was diagnosed and treated for Guillain Barre. There were twenty-two respirator cases and seven deaths, one of which was non-polio.

Due to the unusually high incidence of Poliomyelitis in this period, it was necessary to recruit nurses through the Red Cross. Eleven of these nurses were employed at different intervals extending from the month of July through November. Their assistance did much to relieve the nursing care load that is naturally associated with a seasonal influx of patients.

During the year, the Polio Center personnel continued to give their assistance to the State Department of Health Poliomyelities Surveillance program, and Dr. Fox's viral studies done at Tulane University Medical School.

August, 1956 an automatic auxiliary power unit was received and later installed in the basement of this building. The unit is connected to special electrical outlets in the respirator ward to furnish current for iron lungs in the event of a power failure. This equipment was a very worthwhile addition to the Polio Center.

Respectfully submitted,

EVELYN GOURLEY, R.N. Assistant Supervisor

ANNUAL REPORT ELECTROCARDIOGRAPH DEPARTMENT

July 1, 1956 to June 30, 1957

The accompanying report shows the work performed in the Heart Station during the year. The figures refer to the number of electrocardiograms taken in each month, and to the number of arterial oxygen saturation studies, cardiac catheterizations, angiocardiograms, and cardiac fluoroscopic examinations.

Many sound tracings of the heart were made during the current year but the breakdown for months is not available although the data were placed in the patient's records.

During the year cardiac clinics were conducted every afternoon, Monday through Friday, in order to maintain a closer check on patients with heart disease. There was also a pediatric clinic which is conducted every Friday.

ANNUAL REPORT DEPARTMENT OF ANESTHESIOLOGY AND BLOOD BANK

July 1, 1956 to June 30, 1957

There were a total of 23,488 anesthetics administered of all types throughout the hospital.

During the past year there were significant advances made in the department. The surgical departments instituted the use of the artificial heart for open heart sugery and extended the cardiac surgery considerably. The Louisiana Heart Association subsidized the employment of a full time assistant in the Anesthesia Department to supervise the anesthesia for the cardiovascular surgery. Dr. George Miles, who was completing his residency last October was appointed to this position and now holds it. This arrangement has proved to be ideal both from the standpoint of patient care and the instruction of the residents learning to administer this type of anesthesia.

The activities of the Blood Bank have varied little from previous years. There were a total of 41,191 units of blood collected and 18,623 transfusions given, a total of 21,723 typings and matchings were performed by the laboratories.

The staffing of the Blood Bank became a problem during the year. We were unable during the past six months of the fiscal year to maintain our full staff due to the shortage of technicians. We are hoping that this situation will be relieved in the months to come.

There were 42 nurse anesthetists graduated from the School of Anesthesia. Six residents completed their two year training periods.

Sincerely yours,

JOHN ADRIANI, M. D., Director Department of Anesthesia

ANNUAL REPORT LUNG STATION

July 1, 1956 to June 30, 1957

During the fiscal year the Lung Station carried out ventilatory studies alone on 491 occasions. In addition, studies for evaluation of emphysema were performed on 190 individuals. This was a significant increase in the use of Lung Station facilities for the evaluation of emphysema.

Respiratory function studies involving the determination of arterial blood gases were carried out on 33 individuals during the year. Other respiratory studies were done on 42 occasions.

Although the determination of differential pulmonary function by bronchospirometry was done on only 3 occasions, continuing the trend of 1955-56, the determination of breathing dynamics and the estimation of the distribution of ventilatory function by fluoroscopy was carried out on 150 individuals. This represented a considerable increase in this service over the previous fiscal year.

The Lung Station continued its policy of restricting diagnostic bronchial lavage and needle biopsy to very selected cases. Bronchial lavage, with cultural and cytological study of the washings, was done on 15 individuals. Needle aspiration of the lung or cavitary washing was performed on 10 individuals. Three miscellaneous diagnostic procedures were carried out during the year.

Equipment for the administration of intermittent positive pressure breathing and apparatus for the production of simulated cough was used for therapeutic purposes within the Lung Station on 545 patients. In addition, the Lung Station equipment has been used to a much greater, but undeterminable, degree on the wards and in the recovery room than in previous years. In part, this has been for therapeutic purposes on bedfast or post-operative patients, and in part for resuscitative purposes. Although the Lung Station was initially glad to make its equipment available to the house staff for such purposes, the demand at present exceeds our capacity, and the equipment is often damaged or lost during unsupervised use on the wards. Again, we suggest to the hospital administration the advisability of establishing a department of inhalational therapy within the hospital.

Respectfully submitted,

JOHN H. SEABURY, M.D. Director

ANNUAL REPORT ALCOHOLIC REHABILITATION UNIT

July 1, 1956 to June 30, 1957

During the fiscal year there have been 256 admissions to the Unit with an average patient stay of 14.2 days per patient. The purposes and objectives of the ward have been to enable chronic alcoholic addicts to withdraw from the effects of alcohol under medical supervision and therapy. During their brief stay on the ward, the patients are given a thorough medical evaluation and treatment for any disease, other than alcoholism, that may be present.

Attempts are constantly being made to restrict admissions to the ward to two main groups of patients. Those, well motivated chronic alcoholics who realize that drinking is a problem to them and although trying hard to abstain, have a relapse; and those young patients and other middle-aged alcoholics who have not yet realized that their drinking is a problem.

The Alcoholic Rehabilitation Clinic meets in the White Medicine Clinic 9:00 A.M. every Tuesday morning. The facilities of the Clinic are available to both white and colored male and female patients. The purpose of this Clinic is to work-up and evaluate referrals to the Clinic, and to follow those alcoholics who express a desire to come to the Clinic after discharge from the Alcoholic Ward. During the fiscal year there have been 285 patient visits to the Clinic, 247 of them being white and 38 colored. It has been of some interest to me that a few of the colored patients have had drinking habits and patterns similar to the white male alcoholic, and I believe some of them have derived benefit from contacts in the Alcoholic Clinic.

It is of interest to point out that since the ward was first opened to receive patients on March 16th, 1953, there have been 1,273 admissions to the in-patient ward, 416 of whom were repeaters; that is, patients who have been admitted more than once to the unit. This means that over the 52 months that the ward has been in existence there have been 857 new patients suffering from Alcoholism admitted to the Unit.

According to the Yale School of Alcohol Studies recent estimate, there are 65,000 alcoholics in the state of Louisiana. This means, therefore, that we have only admitted approximately one and one-half per cent of the state's population of alcoholics to the Alcoholic Ward since its inception. There are no facilities for the in-patient care of the white female or the colored alcoholic.

Sincerely,

JOHN B. BOBEAR, M. D., Director, Alcoholic Rehabilitation Unit Charity Hospital of Louisiana at New Orleans

ANNUAL REPORT PREMATURE INFANT CARE CENTER July 1, 1956 to June 30, 1957

I. Administrative Activities

Administrative problems during this fiscal year were at a minimum. Those which occurred were handled on an individual basis between the responsible individuals concerned. No general meetings of a Premature Infant Center Committee were held.

II. Service Activities

There has been no significant change in the numbers of premature infants cared for in this Center, although encouragement has been given to many other state hospitals to develop satisfactory facilities to care for their own premature infants. The Charity Hospital at Monroe has cooperated by transferring most of their premature infants to the Shreveport Charity Hospital. The Charity Hospital in Lafayette has shown considerable, yet inconsistent, improvement in their facilities for caring for premature infants and very few have been transferred to our nurseries here. Further efforts along this line are being continued so as to minimize the potential dangers of long distance transportation of newly born premature infants.

Our basic routines and policies for premature infant management were carefully reviewed by the medical and nursing staffs and a brief and simplified three page summary was prepared and put into operation in March 1957.

Careful review of the size of our staff and daily patient census during the calendar year 1956 led to a revision of our theoretical bed capacity downward. Our large nursery rooms are now designated with a capacity of thirty-six patients each and our small nursery rooms are designated with a capacity of twelve beds each. With only occasional stress, it has been possible to maintain the loads within these limits. Several benefits have obviously resulted from this change, not the least of which is increased efficiency in utilization of personnel time.

Among the extramural services of personnel of this Center was an inspection of the nursery management and facilities at Baton Rouge General Hospital at the invitation of their director and medical staff. The Medical Director and Nursing Supervisor of this Center spent a day in this hospital and prepared a complete report with recommendations, which was forwarded to their staff. A similar service was provided by the Medical Director for the new City Hospital in Columbus, Georgia.

The follow-up services provided premature infants raised in our Center have continued to grow in popularity and an increasing number of infants are being seen repeatedly in the Premature Infant Follow-up Clinic. The effectiveness of this clinic is greatly enhanced by the initial parent orientation with our staff each week at regular predischarge conferences.

A new Medical Social Supervisor of the Premature Infant Center was employed in January 1957 and these services were continued uninterruptedly as in previous years.

Formula preparations for our premature nursery were continued in a highly satisfactory manner throughout the year.

III. Educational Activities

Medical student teaching programs have continued to expand and develop in value to both staff and students. Supervised nursery experience is provided in the amount of fifteen hours for each LSU junior student and ten hours for each Tulane senior student. Additional formal lecture material is presented in both schools throughout the year.

For the second consecutive year a Fellow in the Premature Infant Care Program was employed by means of combined support from Charity Hospital and various research grants. The Fellow for nine months of this fiscal year was Doctor Martha Haley. She was provided with much clinical and administrative experience in our program and her extensive contributions to our service, teaching and investigative activities were invaluable.

Continuous and intensive training of professional nursing students in the care of premature infants was revitalized during this fiscal year under the capable leadership of a new clinical nursing instructor added to our staff. This program provided for an intensive two week period of experience in our Center for ninety-nine Charity Hospital student nurses and thirty-one student nurses from affiliated hospitals.

The complete three week course in the care of premature infants for graduate professional nurses was held four times during this fiscal year under the direction of our Nursing Educational Director. Eleven graduate professional nurses participated in these programs. A two week course in care of prematures was provided for three practical nurses. Many half-day programs of orientation and training were provided to a variety of nursing personnel, including twenty public health nurses, twenty-five representatives from the New Orleans School-Health Division, and fourteen nursing students and two head nurses from the Baptist Hospital in Alexandria, Louisiana. Organized programs for inservice training were provided as a requirement for all newly employed nursing personnel.

In addition to a wide variety of brief teaching activities in our Center as described in earlier reports, this year the Medical Director was invited to give three papers before medical and nursing organizations in Columbia, South Carolina, and two papers to the medical and nursing group in Columbus, Georgia. An exhibit on Care of Premature Infants was prepared and shown at the New Orleans Gradulate Medical Assembly and at the Louisiana State Medical Society Meeting. At the latter meeting a paper on Common Problems in the Management of Prematures was also presented.

IV. Investigative Activities

Serving as a continued stimulus to our own investigative activities, several specific investigations on newborns and prematures by Tulane senior students as part of their curriculum were sponsored by this department. Outstanding among these investigations was a study of a new method for determining gamma globulin levels in premature infants, a thorough investigation of the problem of determining systolic blood pressure in newborns and a very original analysis of growth and development patterns of premature infants. These student projects as developed by the faculty of Tulane Medical School have proven to be quite valuable to our entire nursery program and effort is continuing to encourage further studies from this source of investigators.

After an initial year of developing details of specific procedures, the Micro-Technical Laboratory of the Tulane Pediatric Department was successful this year in obtaining a considerable number of capillary blood specimens from randomly selected premature infants for the purpose of establishing normal values for many common laboratory determinations in prematures of varying ages and birth weights. A major portion of this study was completed during this fiscal year. Support from this source was also effective in amassing considerable data regarding the dietary intakes and hematologic blood values for prematures during the first two years of follow-up in our follow-up clinic. Although this material is not yet ready for publication, extensive charts and tables have been prepared and are maintained in our nursery for easy reference by our staff.

This fiscal year marks the end of our fifth and last year of participation in a comprehensive research program relative to retrolental fibroplasia supported by the National Institutes of Health through our local Southern Eye Bank. This research grant has amounted to approximately twenty thousand dollars per year for the last two fiscal years, most of which has been effectively spent in support of parttime personnel engaged in this study. However, many thousands of dollars worth of permanent investigative equipment have been purchased and are currently available in our Center for future investigative projects. The major accomplishment of this program during this year was the successful development of a technic for measuring tissue oxygen availability continuously in premature infants. This work was selected for presentation before the Society for Pediatric Research Meeting in Carmel, California, in June 1957. Considerable data has been amassed during the course of this study in the fields of growth and maturation of the eyes of prematures. This data is currently being analyzed.

An extensive long term interdepartmental project was initiated this year by the Departments of Pediatrics, Obstetrics and Pathology of LSU Medical School. This project, known as the LSU Perinatal Project, involves a relatively complete collection of data from these various departments on all deliveries, newborns and perinatal autopsies on the LSU service. This material has been tabulated on IBM equipment and preliminary surveys of these records indicate tremendous potential value of this project as significant numbers of cases are collected.

Two clinical therapeutic trials were conducted on premature infants during this year. A study of several medications for the treatment of thrush was successfully completed by members of the LSU pediatric and microbiology staffs. A clinical trial of a potential growth stimulating hormone was conducted by the members of the Tulane pediatric staff. Both of these studies are in process of analysis for later reports.

A new grant to the Medical Director of the Premature Infant Care Center from a commercial source through Tulane University was activated in January 1957 and provided valuable additions to the auxiliary and supporting studies in pathology and animal experimentation relative to premature and newborn infants.

Throughout this fiscal year our nursery was operated consistently under the "Unit-Plan for Epidemiological Study," this plan consisting basically in the principle of admitting new infants to particular positions within our nursery and keeping them in that spot under the care of essentially the same personnel throughout their nursery stay. Infants have never been moved from their original position despite the incidence of any infectious symptomatology. This method of nursery management has now had twenty-two months of continuous trial repre-

senting over fifty thousand patient days. Extensive records and graphic illustrations of our results have been prepared, all seeming to indicate overall advantages of this method for our unique nursery problems. At our invitation, the Division of Infectious Diseases and Epidemiology of the U. S. Public Health Service inspected our nursery and this particular system in December 1956. Their report was quite complimentary and they are now conducting a series of studies on etiology of the type of diarrhea we so frequently experience in our nurseries.

Extensive and comprehensive meetings and activities were begun involving many departments of both medical schools and Charity Hospital for the purpose of obtaining additional support for long range investigative activities in hospitalized newborns, prematures and neurologically damaged infants during the pre-school years. Whether or not such efforts have been successful will not be known until next year.

Three reports of work from this Center were published during this year as follows: "Electron Microscopy in the Premature Infant Lung" by William T. Newsom, M.D., and "Determination of Systolic Blood Pressure in Newborn Infants" by Fordtran, John S., Killinger, William A. and Newsom, William T. appeared in the Bulletin of the Tulane University Medical Faculty, February 1957, and a paper entitled "Anticipatory Management of Newborn Infants" was published in The Recorder, October 1956.

The above summary represents a considerable increase in investigative activities during this fiscal year. This has been accomplished with only occasional mild distrubance to our staff, essentially no increase in load on personnel, and with demonstrable and valuable additions to our basic knowledge of premature and newborn infants.

Respectfully submitted,

WILLIAM T. NEWSOM, M.D. Medical Director

ANNUAL REPORT THE TUMOR REGISTRY

July 1, 1956 to June 30, 1957

The original Registry, which was established in October 1947, was reorganized and expanded in June, 1953. This was accomplished through the cooperation of the sponsoring agencies consisting of the American Cancer Society Louisiana Division, the Louisiana State Department of Health, Charity Hospital, and the Medical Schools of Tulane and Louisiana State Universities. Technical advice and assistance was provided by consultants from the Statistical Research Section of the American Cancer Society. As a result of this reorganization and expansion, the Registry has been approved by the Committee on Cancer, American College of Surgeons.

TUMOR REGISTRY BOARD

The governing board of the Registry presently consists of the following members who are representatives from the institutions mentioned above and from the Louisiana State Medical Society:

Leo J. Kerne, M.D.—Charity Hospital Manual Garcia, M.D.—Charity Hospital

J. D. Martin, M.D.—Louisiana State Department of Health J. D. Rives, M.D.—American Cancer Society, Louisiana Division, Inc.

J. D. Rives, M.D.—American Cancer Society, Louisiana Division, Inc. Ambrose H. Storck, M.D.—Louisiana State Medical Society W. W. Frye, M.D.—Louisiana State University School of Medicine

R. J. Muelling, M.D.—Louisiana State University School of Medicine *Edward T. Krementz, M.D.—Tulane University School of Medicine R. C. Smith, M.D.—Tulane University School of Medicine

Consultants

Mrs. Marian M. Simmons, Executive Director, American Cancer Society, Louisiana Division

E. Cuyler Hammond, Sc.D., American Cancer Society B. Aubrey Schneider, Sc.D., American Cancer Society

OBJECTIVES

- (1) To establish the identity of every cancer patient seen at Charity Hospital and develop a master file for the entire case load.
- (2) To abstract and summarize the hospital records of each cancer patient diagnosed since January, 1948 together with continuous new accessions.
- (3) To obtain annual informational follow-up on each patient for the life time of the patient.
- (4) To transfer information from the abstract and follow-up to punch cards for electric machine accounting.
- (5) To provide an annual overall statistical analysis of the accumulated data in order to indicate the size and nature of the cancer problem at Charity Hospital.
- (6) To provide information to the medical staff at Charity Hospital and other persons concerned with cancer control, for the purpose of teaching and research.
- (7) To serve as a prototype for other hospitals in the state interested in establishing their own registries.

^{*}Chairman of the Board

INFORMATION AVAILABLE FROM THE REGISTRY

Any person duly authorized to obtain information according to existing regulations may apply to the Registry where a form for "The Request and Release of Information" is available. Information from the following records is available:

- (1) The identity of all patients diagnosed with a malignant disease retroactive to January, 1948 with continuous new accessions added.
- (2) An abstract summary from the patient's hospital chart complete with follow-up reports on each individual patient.
- (3) Punched cards containing the abstract and follow-up information for electric machine accounting.

The abstract records and punch cards contain information as to the identity of the patient, residence, age, race and sex, number of primary cancers with anatomic sites, date of original diagnosis, basis of diagnosis, histology, stage of disease, treatment. Follow-up includes date and source of follow-up or death, survival years and months, subsequent treatment, condition of patient and in the case of deaths, cause of death.

Copies of the Tumor Record abstract and follow-up reports placed on the patient's hospital chart are available to those interested in having a ready summary with follow-up for use at the time the patient is seen or in reviewing the hospital chart for other purposes.

In addition to the above mentioned, there is available detailed statistical data in the form of tables, graphs, charts, etc. too lengthy to include in this report. Other interesting information includes published reports, reprints of articles, publications, guest book for visitors, exhibit material, lantern slides, map of the USA pinpointed to indicate the place and number of patients traced out of the state, a map of Louisiana indicating the number of patients by parish residence, etc.

STATISTICAL ANALYSIS

From the collection of data for the period 1948 through 1955 a statistical analysis was made by Mr. Abraham Ringel under the direction of Dr. B. Aubrey Schneider of the Statistical Research Section, Medical and Scientific Department, of the American Cancer Society. The analysis includes statistics presented in graph and table form and covers pertinent information relative to site, age, race and sex, stage of disease, microscopic information and survival. Copies of the analysis were distributed to the Medical Staff of the hospital and others interested in cancer control. The material was also used in the article "Report from the Tumor Registry, Charity Hospital of Louisiana at New Orleans 1948-1955" which was jointly prepared by Dr. Edward T. Krementz, Dr. Rudolph J. Muelling, Jr., and Marion Wogan and published in the May issue of the Louisiana State Medical Society Journal. Additional use of the material included an exhibit at the annual meeting of the Louisiana State Medical Society held in New Orleans during May and newspaper articles released by Mr. Patrick McGrady of the American Cancer Society. The latter article also appeared in the "Cancer Reporter, Louisiana".

COORDINATED PROGRAMS

In June, 1956 this Registry was one of eleven hospital registries which submitted data relative to End Results for use at the Third National Cancer Conference held in Detroit and which is incorporated in the report "Cancer at Mid-Century". In September, 1956 an invitation was extended to these same registries to participate in a cooperative program with the

Cancer Chemotherapy National Service Center of the National Cancer Institute in studies directed toward the accumulation of detailed information of large groups of cancer cases as a base line for evaluation of the results produced by chemotherapeutic agents. The invitation was accepted and the Registry is actively participating in the program through contractual agreement which provides mutual benefits.

SUMMARY

At the close of this fiscal year the Registry is operating on a current basis with the exception of some cases in the backlog group in need of informational follow-up. Much effort and time has been spent in reducing this number. It is believed that in the coming year follow-up will be brought up to date thus providing adequate and accurate information on survival.

Attention from a local, state and national level has been focused on the Registry, with recognition as to the value and important part it plays within the framework of a cancer program. This has been brought about through the use and distribution of material from the statistical analysis, which for the first time has provided an overall picture of the cancer situation at this hospital, reports and assistance to doctors and interested persons and the outside coordinated program with other agencies.

VOLUME OF CASES

As of the close of this year the Registry contains 14,529 abstracted cases of cancer covering the period of 1948 through 1956.

Respectfully submitted,

MARION S. WOGAN, Director Tumor Registry

ANNUAL REPORT MEDICAL SOCIAL SERVICE DEPARTMENT July 1, 1956 to June 30, 1957

To many of the patients of Charity Hospital the advent of illness brings with it social disorganization which is beyond the ability of the patient or his family to control. This is not surprising. Serious illness or disability, by its very nature, produces emotional and financial strain. It is to be expected that such strain would be especially disrupting among the families of Charity Hospital patients. The great majority of these families are in the low income, or sub-standard income brackets. In such families, who live, as it were, on the borderline of stability, the additional strain of illness may well be the force that upsets the balance, and makes outside help necessary.

Services to Patients

Examples of some of the kinds of help needed by patients, and provided through the social service department, are given below:

- 1. The social worker was asked by the doctor to arrange for financial assistance for Peter Nicholas and his wife and three children. Mr. Nicholas, a twenty-three year old man, had been found to have lymphatic leukemia with a life expectancy of one year at the most. The patient was discharged on a regime of meticorten, which was secured through the American Cancer Society, and arrangements are being made for the family to receive financial assistance through the Department of Public Welfare. When the patient's young wife was first seen, she was extremely upset and confused. Not understanding the patient's condition, she did not realize the gravity of the situation, and was inclined to think he was exaggerating his symptoms. A conference with the doctor helped to clear this up, and made it possible for Mrs. Nicholas to plan for the future more realistically. The social worker will continue to see Mrs. Nicholas as she will need help in caring for her sick husband at home, and as she is having to shoulder responsibilities which she is not mature enough to carry alone.
- 2. An older man, Charles Abbott, was referred by the doctor for financial assistance. This patient had an organic brain condition which would not permit his returning to his former employment around machinery. Temporary financial assistance through the Department of Public Welfare was arranged. However, the patient's history revealed that he had an excellent work record of which he was extremely proud. He had been depressed at the time of referral, at the loss of independence, and hopeless about the future. During the three months period the worker has been seeing this patient, his depression has been relieved through support and encouragement. With the relief of his depression, his physical symptoms have decreased. The patient has been helped to find a part-time job which is within his capabilities, and he is now able to feel again the pride of being a breadwinner.
- 3. A thirty year old woman, Lily Gray, came to the office seeking financial assistance. She had been followed in surgery and medicine clinics for treatment of severe hypoparathyroidism. In her contacts with the social worker, the immediate problems of procuring medication and financial assistance were handled in cooperation with the

Department of Public Welfare. During these contacts she exhibited extreme anxiety and symptoms which suggested that she was disturbed enough to need professional psychiatric care. Because of a previous unfortunate experience she was unwilling to seek such help. The services of the staff psychiatric consultant were utilized, and with his cooperation, the patient was hospitalized for treatment. Following her release from the mental hospital, the patient continued seeing the social worker. She has subsequently been referred to the Vocational Rehabilitation Department, and is being trained as a beautician. This patient's emotional balance will probably continue to be unsteady, but with help from the social worker as needed in time of crises, and with a job which is not too demanding, it is anticipated that she will make a reasonably good adjustment, and will be able to be self-sustaining for the most part.

Assistance of the kind described above was made available to 37,320 patients and their families during the past fiscal year. Permanent records were made of the services given in 8,258 cases. These were cases in which recording was needed in order to facilitate the current treatment process, or in which a record was thought to have some future value. In 29,062 cases, the service given, while important in terms of the immediate needs of the patient, and from the point of view of facilitating hospital procedures, was of a more incidental nature not requiring a permanent record.

In social work, no two problems are quite the same, nor are the means of solving them. A true statistical measure of the work of a department such as this is not feasible, since problems vary not only in type, but also in intensity, and in the amount and quality of work their solutions require. However, certain tangible services are given in appreciable numbers. Below are listed some of these types of services, the numbers of patients helped, and the numbers of contacts needed to complete the service.

Service

No. of Patients	No. of Contacts
Nursing care in the home	310
Child Placement	218
Placement in nursing home	1056
Financial assistance1025	1211
Homemaker Service 29	41

Shelter Home Care 107	137
Appliances and medication1437	1810
Transportation 201	291
Hospitalization & other medical procedure 411	575
Assist with emotional adjustment	1027
patient's social situation	871
situation to other agency 429	674
Interpretation to patient group	1427
Unmarried mothers served 37	84

The social workers do not see every patient who comes to the hospital for treatment. This would not be feasible, nor would it be advisable, since not every patient needs this particular kind of help. It does, however, create the problem of case-finding: that is, of determining which of the patients most need service. In the main, these patients are referred to the Department by other persons, such as doctors, nurses, and interested

individuals in the community who know of their difficulties. Of the patients served in the period covered by this report, 11,690 patients were referred to the social workers by hospital personnel (doctors, nurses), 5,304 by the Department of Public Welfare, 3,406 by other social agencies, and 16,920 by the patient himself, a member of his family, or by clergymen, public officials or other persons outside of the hospital.

Like other departments in the hospital, Social Service offers services to patients from the entire State. The geographical distribution is as follows: patients from Orleans Parish 23,940, patients from other parishes 13,048. Although residence in the State is a requisite for treatment in Charity Hospital, a certain number of known non-residents are accepted for emergency treatment. Of these, 334 needed some help from Social Service.

Use of Funds

Small funds are available to the department which can be used to meet the medical needs of some of the patients. These funds are derived for the most part from donations, although one, the Patients' Welfare Fund, is provided through hospital funds. The amounts available for the past fiscal year were:

Stauffer-Eastwick	\$4800.00
Fatients' Welfare	1200 00
Weil Convalescent	360.00
Social Justice	110.00
American Cancer Society	506 57
Rykoski Family (Donation)	1950 00
Special Donations	275.00
Total	\$9201.57

Expenditures were as follows:

Reason for Using Fund	No. of Patien	Amount Used
Medication	5783	\$7,063.20
Transportation	261	633.42
Maintenance	20	133.50
Appliances	265	1,058.87
TOTAL	6329	\$8,888.99

Only the most pressing needs of patients can be met through the use of these funds, and many urgent needs necessarily go unmet. An effort is made to limit these expenditures to emergencies, in which an immediate financial problem exists. The needs for long term financial aid are referred to other agencies in the community, in most instances, the Department of Public Welfare.

One of the most serious problems with which the Department deals is that of the patient who cannot purchase medications prescribed for him by the doctor. This hospital does not provide medications for out-patients. While many of the patients can pay for their own medicines, there are many who cannot. Even though it is officially recognized that the hospital has no responsibility for meeting this need, large numbers of patients are referred to Social Service for help in securing drugs. The numbers of

patients referred to Social Service for help in securing medications is increasing rapidly, as more and more patients are being maintained on an out-patient basis on drug therapy, where previously they had to be hospitalized. That these drugs are extremely expensive affects the problem in two ways: fewer patients are able to afford them, and Social Service funds would not nearly meet this need.

The scope of this problem has extended beyond limits which can be handled within the Social Service Department. The numbers of patients and amounts of money involved are too large for the staff and budget of the Department. To purchase medications for patients on a selective basis requires the use of medical judgment which social workers do not have. Careful consideration should be given to the question as to whether this department should continue to try to fill even partially this over-all need of clinic patients.

Eligibility Determination

Since 1941, this Department has been responsible for determining eligibility for hospital care. Eligibility depends upon the financial and residence status of the patient, and is determined on an individual basis whenever possible, taking into account such factors as the duration and cost of the treatment needed, whether the employment of the family breadwinner will be interrupted, and whether they are previously incurred obligations, particularly for medical treatment. A fair decision as to whether a patient will be accepted or rejected for treatment depends upon the results of a reasonably comprehensive interview, followed by verification of his statements through employers, banks, tax statements, or other sources. In many instances a conference with the doctor is necessary to determine the nature of the treatment needed, and whether, in the case of the ineligible patient, he can safely be moved to a private facility.

The unit which determines eligibility is administered by one of the social service department supervisors, who has other responsibilities in the department in addition to this particular function. The unit itself consists of nine interviewers, who are distributed as follows: Accident Rooms, four workers (more complete coverage in this section is needed because of the large amount of emergency work, and the comparatively high percentage of ineligibility); wards and clinics, five workers. Because the number of workers has been so very limited, it has never been possible even to approximate a thorough screening program of ineligible patients. At best, only the most obviously questionable cases can be selected for investigation. During the past fiscal year, 28,770 patients were investigated for eligibility. This represented roughly 12% of the total number of patients applying at the hospital for treatment. Of the 6,445 found to be ineligible, 2,537 were referred elsewhere for treatment, while 3,908 were given emergency treatment, billed, and then referred elsewhere. The table below shows the numbers of patients interviewed, eligible and ineligible, according to services:

	Number	Number Eligible	Number Ineligible
Clinics	. 2,666	1,268	1,398
Wards		4,548	491
Accident Rooms	.21,065	16,509	4,556
TOTAL	28,770	22,325	6,445

Staff

Shortage and turnover of professional staff continues to be the Department's most pressing problem. There was one resignation in the supervisory staff. This vacancy was filled by promotion from the staff. Otherwise, the supervisory staff remained stable, though with one additional vacancy. The latter will be filled at the beginning of the fiscal year with another promotion from the staff.

Of a complement of 32 staff workers, medical and psychiatric, there was an average of 13 vacancies throughout the year. Among the filled positions, there were seven resignations of full time workers, and eight replacements. The employment of several part-time workers has been helpful, but is not a solution.

There was comparatively little turnover in the clerical staff.

The difficulty in maintaining stability in professional staff is not unique with this Department, as there is a nationwide shortage of qualified social workers. However, it has certainly been intensified here by the fact that salaries have been at a level which made competition with other agencies impossible, even those operating in the same Civil Service classifications. Inconsistencies in salary ranges and job classifications within the State Civil Service system have placed this Department at a disadvantage in comparison with other State institutions. It is anticipated that the adoption of the new pay scale recommended by Civil Service will be of appreciable help in this area. However, there are still inequities in pay ranges: there is a differential between the medical social consultant and the medical social worker series, and between the psychiatric and medical social work series. Salaries in social work series other than medical and psychiatric are comparatively higher.

Because of the critical staff shortage during the past year, it became impossible to provide adequate social services throughout the hospital. Staff workers were spread so thin that the occurrence of additional vacancies meant that their efforts would be so dissipated as to be of doubtful value to the patient or to the hospital, and the workers themselves felt the pressures of an overwhelming job. It therefore became necessary to curtail coverage in some way. The decision was made to concentrate services in the areas of the hospital in which they were thought to be most needed, i.e., the wards, admitting and accident rooms, and certain selected clinics such as pediatrics, orthopedics, and psychiatry. The social workers were withdrawn from most of the other clinics. This has made it possible to give more adequate service where it is needed most, and permits performance of a higher quality by staff. As additional workers become available, reassignments to the clinics will be made on a selective basis.

ANNUAL REPORT MEDICAL AND PATIENTS' LIBRARY July 1, 1956 to June 30, 1957

Staff

The staff of the Medical and Patients Library remained the same in this fiscal year as that of the last. A total of seventy-eight hours was worked by seventeen volunteers assisting the regular staff. Their cooperation was appreciated by the staff as well as the patients of this institution.

Reading Room Activities

Attendance in the reading room was very high. Members of the medical and professional staff found the medical books and journals very helpful in their reference studies.

By donation, subscription and direct purchase, the collection of books is constantly growing. The medical journals, periodicals and fine collection of fiction and non-fiction make the library a center of interest in the hospital.

Ward Activities

A major contribution to the morale of patients on wards was the daily schedule maintained by the volunteers and staff of the library with the book truck. Hundreds of magazines, and books, both bound and paper-back were circulated among the patients.

ANNUAL REPORT July 1, 1956 to June 30, 1957 PEDIATRIC RECREATIONAL PROGRAM Sponsored by the Council of Jewish Women New Orleans Section

The Pediatric Recreational Program at Charity Hospital, a project originated and sponsored by the New Orleans Council of Jewish Women is now in its tenth year. The Program is designed to care for the social, emotional, ethical and recreational needs of the hospitalized child.

The attractive Piay Room continues to be well supplied with toys, games and equipment which is replaced as necessary from the budget that the hospital allocates to the Program. The hospital also assumes the responsibility of maintaining the Play Room, minor repairs and maintenance. The Council of Jewish Women, New Orleans Section assumes full responsibility for the Director and Assistant Director's salary, as well as other emergency needs. The Council continues to act in an advisory capacity and join with the community in volunteer service.

Volunteer participation is a most important contribution to the Recreational Program. During the past fiscal year 168 were active. The group was comprised of 87 day time workers, 47 evening volunteers and 34 special workers, who served 4,630 hours. The volunteers continue to bring new enthusiasm and skills to the child patients and are eagerly received by the children. The average number of volunteers participating each month in the Recreational Program average approximately 55. Volunteer training programs are scheduled periodically to train the volunteers in various phases of the work. Routine orientation is given each new volunteer upon entering the Program.

Student nurse training in recreation has been a positive experience for the students. It has given strength to the Program and has been of value to the students, as well as the Program. This year 420 students have rotated through the Program, receiving 2,100 hours training experience.

We have been very fortunate to have received many splendid and generous gifts and contributions from interested friends and organizations. These gifts have been most helpful and enthusiastically received by the children.

(Mrs.) Amy Harrison, Recreational Director

Besides making surgical dressings for the Hospital patients, following are some of the other activities of the members of the Guild.

Fifty-five layettes were made and given as needed; also a large amount of used clothing, new and used shoes, books, magazines, scrap books, picture puzzles, games, and toys.

At Christmas, four-hundred dolls and toys were given to the children on the ninth floor, also to the children in the contagious, Polio, and Tuberculosis wards. The party was given by Mrs. Walter Grunning, Chairman of the Doll and Toy Committee.

A Christmas and Easter party were given by the colored willing workers of the Guild, to the children in the Tuberculosis wards. At the Christmas party, each child received a doll or toy and a pair of bed-room slippers. At Easter, each child received an Easter basket, and at both parties, ice cream and cake were served.

At Christmas, we also gave to Sister Mary Frances, dresses, sweaters, and sun suits for the children, as needed.

A Christmas and an Easter party were given by the Magnolia Branch of the Louisiana Sunshine Society for the male patients in the John Dibert ward. At the Christmas party, each patient received two sweat shirts, and at the Easter party, each patient received an Easter basket. At both parties, ice cream, cake, and fruit were served. This Society also gives four pounds of coffee weekly for the male patients in the John Dibert ward; and at Easter, they gave to the Orthopedic patients on the seventh floor, Easter eggs and fruit. This entertainment, gifts, and refreshments were greatly appreciated, and enjoyed by all.

Four parties were given by the Guild members to the Golden Age ladies, who come weekly and help to make surgical dressings.

ANNUAL REPORT HAPPINESS HELPERS

July 1, 1956 to June 30, 1957

During the year the Happiness Helpers have visited the children at Charity Hospital almost daily. We donated \$2,000 to the Endowment Fund and \$1,000 toward the Polio Air Conditioning Unit, three wheel chairs, cost \$150.00, about 250 reconditioned toys, \$100.00 to the Doll and Toy Fund and \$150.00 for Sundry gifts. We have given the children happiness on the following occasions: King's Day, Valentine, Mardi Gras, St. Patrick's Day, Easter Saturday, 4th of July, Sara Lee's 51st Anniversary and Sara Lee's Birthday, August 27th, Hallowe'en and Thanksgiving.

For these happy occasions the donators have received ice cream, cake, candy and small gifts amounting to several hundred dollars. The names of the donators are being withheld at their request.

We have visited several patients on the ninth floor and also on some of the other floors. We hope our humble efforts have been of some good and cheer to the many sick and unfortunate people in this institution.

> Sara Lee Judas, President Happiness Helpers Louisiana Sunshine Society
